While the Liberals have accepted the message of President Taft to represent the true sentiment of the Washington administration, the wave of feeling that has been aroused in the Dominion cannot be ignored and it is said that Sir Wilfred Laurier early next week will make a statement which it is asserted will set at rest forever the idea that annexation of Canada by the United States is possible.

we will throw the whole proposition overboard and go on with independent development under which we have been prospering for twenty years and which has given Canada more revenue and railroad mileage per head and more general prosperity than any country in the world.'

Another leading Liberal said:

"We can do better with easier trade conditions between Canada and the United States, but if there is a feeling south of the line that the trade agreement is the first step toward annexation, we can get along without the agreement, and will do very well as we have in the past.
